Subject: RE: Missouri Electric Works 5YR Hydrogeo comments

---

I forgot to write down the comment coordinator for this 5YR so I asked Venessa & she indicated that you where the lucky person; she is the eco person assigned to this site. When we had our initial meeting with Dan G. (RPM) last Sept. he indicated that he wanted comments to him by March.

Does this help.....the site is located in Cape Girardeau, MO...PCBs & VOCs; fractured bedrock and alluvial aquifers; TI wavier for bedrock aquifer; 2 RODs; a few ESD along the way; 3 OUs – OU1 soil, OU2 groundwater, & OU3 wetland area. Only OU1 has been implemented thus far.

I'm at the stc, so I don't have my fyr sheet in front of me. I don't remember seeing or hearing anything about this one. Should I have received something on it by now? Who's the rpm? Do you know when it's due?
